1. Prior rejections under 35 USC 112 set forth in items 3a and 3c of the Office action mailed 6/4/2007 are withdrawn in view of amendment. Prior rejection under 35 USC 112 set forth in item 3b of the Office action mailed 6/4/2007 is withdrawn in view of argument and supporting references cited by applicant. Applicants' asserted conventional definition of "mileage" is accepted.

***Comment on International Search Report***

2. Although the ISR contains X references cited against the claims, the International Preliminary Examination report concluded that all claims filed in the PCT application had both novelty and inventive step in view of said references. Each of DE 19945980, US 4,536,550 and US 4,336,352 indicate that the making of trimodal polyethylene blends for the purpose of improving the properties of blow moldings was conventional at the time of the instant application. However, none of the cited references includes all features of the claims as currently amended because none discloses the combination of density, MFI and the specific combination of three viscosity values for the polymer components and blends. Furthermore, no teaching, suggestion, motivation or conventional/predictable practices in the art would lead the ordinary skilled worker to make the claimed composition or use the claimed process.
